Country - Canada

C-12 Law - Canadian Net-zero Emissions Accountability.

→ Explanation of Law:-

- This enactment targets for the reduction of green house gas emission is ~~Canada~~ Canada to a net-zero by the year 2050.
- There are targets ~~set~~ to be set by the Minister of the Environment for the years 2030, 2035, 2040 and 2045.
- There will be an emission reduction plan, a progress report and an assessment report for each target made by each house of parliament.

→ People's views on the law:-

- Positive:-
 - * Many feel that the law was a crucial step towards a better climate.
 - * The C-12 gives many children hope for a livable planet in the future.
 - * Some suggest that the C-12 was the right response to 30 years of failed climate goals.

_ / _ / _

- Negative:-

- * Many people argue that the law is too weak. There is a lack of accountability to the law.
- * The first target being set to 2030 reduces the strength of the law C-12 and hence a lot of people are saying that the law needs to be strengthened by setting a target for the year 2025 also.

→ Conclusion:-

- It can be concluded now that the law is a very crucial step that was taken after 30 years of failed targets.
- The C-12 law will increase the safety of the environment.
- Yet the law ~~isn't~~ isn't strong enough for people to strictly follow the law. And hence needs to be strengthened by setting a target for the year 2025 also.
